

SET SUBJECTS FOR 2026/27

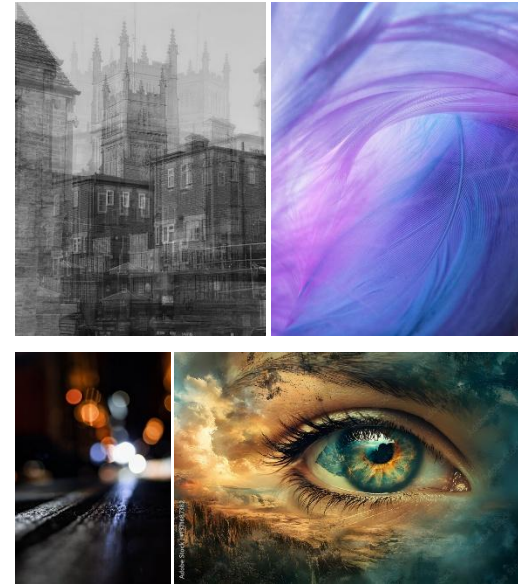

'Creative' – PDI & Print, 11th February 2027

Our technical challenge this season is 'Creative'. I have borrowed this definition from Winchester PS who award an annual Creative Cup

“an innovative image based on one or more of the author’s photographs. It should be original, creative and avant-garde, originating from the camera and the photographer’s imagination. No limits!”

However, no clip art or AI imagery, etc. It needs to be all your own work.

Creative images cover a mix of styles, genre and subject matter, some using obvious in-camera or post process techniques and others relying on innovative composition.

'Happiness is...' – PDI & Print, 11th March 2027

I don't think we've done a mood-based subject for a while. It's not always easy to impress a specific feeling in the viewer - in this case the positive feeling of happiness.

You may want to think about broadening the subject, away from the 'voyeur' (candid shots, laughing kids, pets, etc.) and consider not only the literal meaning but also the stories behind the theme. Maybe those everyday moments or chance encounters that bring on a smile, making life a little brighter.

Remember, choosing titles carefully helps convey your message.
